Mr. President Sarkozy,

as spokeswoman of EPAW-Germany - the European Platform Against Windfarms - and as a worshiper of French culture, I ask you to assert your influence to avoid the construction of industrial wind turbines in the region of the world cultural heritage UNESCO in Normandy.

Please, take care that the landscape does not become disfigured, and the cultural heritage Mont Saint Michel will remain preserved in its beauty and importance.

I guess the site of Mont Saint Michel will be excluded from the world heritage, whether industrial wind turbines which are projected in the region, will be installed.

We hope you will intervene in the interest of the French cultural heritage, of people and nature in Normandy.

Sincere greetings from northern Germany which has been already destroyed unbearably by industrial wind turbines.

Jutta Reichardt
